# About Envirosafe

## Environmental responsibility translated into practical performance

Envirosafe Tech LLP is a multidisciplinary environmental, health, safety and sustainability consultancy. We help organisations understand regulatory obligations, manage environmental risks and improve operational performance.

Our work combines scientific assessment, regulatory knowledge and operational insight. This enables us to move beyond report preparation and help clients convert environmental requirements into clear actions, defensible documentation and measurable improvement.

**Based in Lagos and supporting engagements across Nigeria, we work in maritime operations, petroleum, manufacturing, construction, recycling, hospitality, retail and infrastructure development.**

**Understanding the operation before defining the solution**

# Messages from the Managing Partners

## Two perspectives, one shared responsibility for every assignment

### DARE AYODELE JOSHUA

**Managing Partner and Lead Consultant**

"We established Envirosafe to help organisations turn environmental responsibility into better decisions and stronger operations. Our role is to understand each client's reality, provide credible evidence and support solutions that can be implemented."

### ATOYEBI YETUNDE MODUPEOLUWA

**Managing Partner and Regulatory Compliance Lead**

"Our work depends on disciplined methods, clear documentation and consistent follow-through. We balance regulatory expectations with operating realities, while keeping the people and communities affected by each assignment in view."

**SHARED LEADERSHIP SPOTLIGHT**

**Our partnership combines technical leadership with regulatory discipline. Every assignment receives joint oversight from definition through close-out.**

# Purpose, vision and mission

PURPOSE

**To help organisations grow responsibly by making environmental, safety and sustainability requirements practical, measurable and part of everyday operations.**

VISION

**To become a trusted African environmental and sustainability consultancy recognised for technical integrity, practical execution and lasting client value.**

MISSION

**To deliver credible assessments, compliance solutions and management systems that protect people and the environment while improving operational performance.**

# Our values

## The standards that shape our decisions and delivery

01

### Integrity

We communicate honestly and protect professional independence.

02

### Technical excellence

We apply sound methods, evidence and disciplined review.

03

### Practicality

We develop recommendations that work within operating realities.

04

### Partnership

We listen, collaborate and maintain productive relationships.

05

### Accountability

We take ownership of commitments and delivery quality.

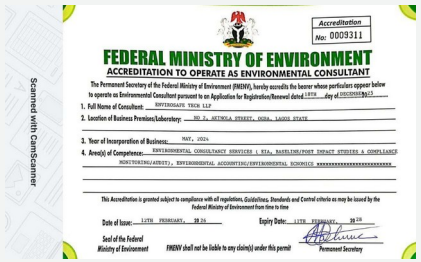

# Our services

## Integrated support across the environmental management lifecycle

- Environmental assessment and project approvals
- Environmental audits and post-impact assessments
- Air, water and effluent monitoring
- Pollution control and spill response
- Site remediation and rehabilitation
- Waste and hazardous-material management
- Sustainability and ESG advisory
- Environmental and social management systems
- HSE audits, risk and emergency planning
- Training and capacity development
- Permits and regulatory documentation
- Continuous environmental support

# Accreditations and operational permits

## Recognised competence and regulatory authorisation

### Federal Ministry of Environment

Environmental Consultant Accreditation 0009311

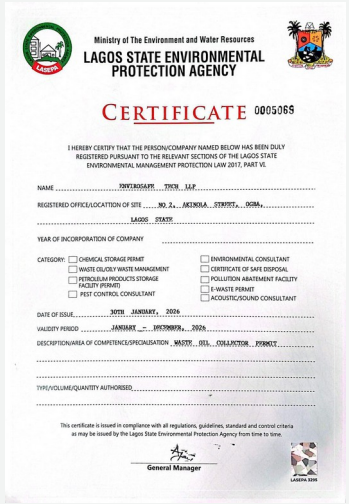

### NESREA

Registration 134974

### LASEPA Consultancy

ID LASEPAET0040

### Waste-oil management

LASEPA Waste Oil Collector Permit 0005069

# OUR SOLUTIONS

**Focused technical support for approvals, compliance, performance improvement and long-term environmental management.**

AUTHENTIC FIELD IMAGE

# 01 Environmental assessment and project approvals

## Environmental issues addressed before they become delays or costly redesigns.

We support developers and operating organisations through structured assessment and approval processes. Baseline evidence, impact analysis and practical mitigation provide a defensible basis for project decisions.

**SCOPE OF SUPPORT**

- EIA and ESIA studies
- Environmental evaluation and baseline studies
- Scoping and terms of reference support
- Impact assessment and mitigation planning
- Environmental Management Plans
- Regulator-facing approval support

**Project evidence that supports informed decisions**

# Environmental studies and approval services

## A broad technical scope aligned to the client's project and regulatory pathway

### PROJECT AND IMPACT STUDIES

- Environmental Impact Assessment
- Environmental and Social Impact Assessment
- Environmental Assessment
- Environmental Evaluation Studies
- Post Impact Assessment
- Baseline environmental studies

### MANAGEMENT AND ASSURANCE STUDIES

- Environmental Audit Reporting
- Environmental Due Diligence
- Environmental and Social Management Plan
- Environmental Management Plan
- Waste reduction schemes
- Environmental performance benchmarking

**The final study scope reflects the project, operating environment and requirements of the relevant authority.**

# 03 Environmental auditing and compliance

## Compliance gaps converted into clear priorities and corrective action.

We assess facilities against applicable requirements, review operating evidence and help management prepare for regulator and third-party scrutiny.

**SCOPE OF SUPPORT**

- Environmental and post-impact audits
- SHE audits and compliance reviews
- Compliance registers and permit support
- Corrective-action planning
- Close-out verification
- Environmental performance reporting

**Field observations supported by disciplined documentation**

# 04 Environmental monitoring and field services

## Reliable field evidence for regulatory reporting and operational decisions.

Monitoring programmes combine appropriate sampling, field observations and structured reporting. We coordinate competent laboratories where analytical testing is required.

**SCOPE OF SUPPORT**

- Air quality and noise monitoring
- Surface water and groundwater assessment
- Effluent sampling and review
- Soil and sediment assessment
- Baseline and periodic monitoring
- Data review and compliance interpretation

Prepared field equipment and traceable monitoring evidence

# 05 Pollution control, spill response and remediation

## A controlled path from identified contamination to verified improvement.

We help clients investigate pollution risks, plan appropriate responses and strengthen prevention controls. Each response reflects the source, pathway, receptor and operating context.

**SCOPE OF SUPPORT**

- Pollution risk assessment
- Spill preparedness and response planning
- Bioremediation and rehabilitation support
- Groundwater and site investigations
- Pollution-control advisory
- Implementation oversight and verification

**Controlled remediation supported by monitoring and safe work practices**

ILLUSTRATIVE IMAGE

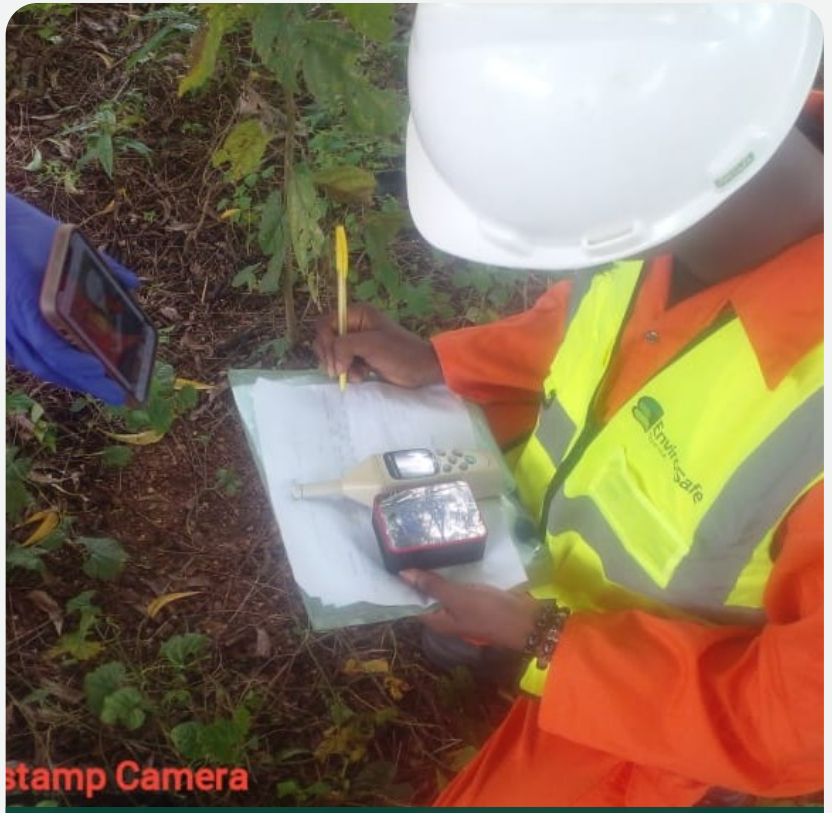

# 06 Waste and hazardous-material management

## Traceability and control throughout the waste lifecycle.

We help organisations understand waste streams, improve segregation and storage, strengthen documentation and select suitable recovery or disposal routes.

**SCOPE OF SUPPORT**

- Waste characterisation and inventories
- Waste minimisation and segregation
- Hazardous-material handling review
- Waste-oil collection support
- Vendor and disposal-route due diligence
- Tracking, documentation and awareness

**Accurate identification supports safer handling and stronger traceability**

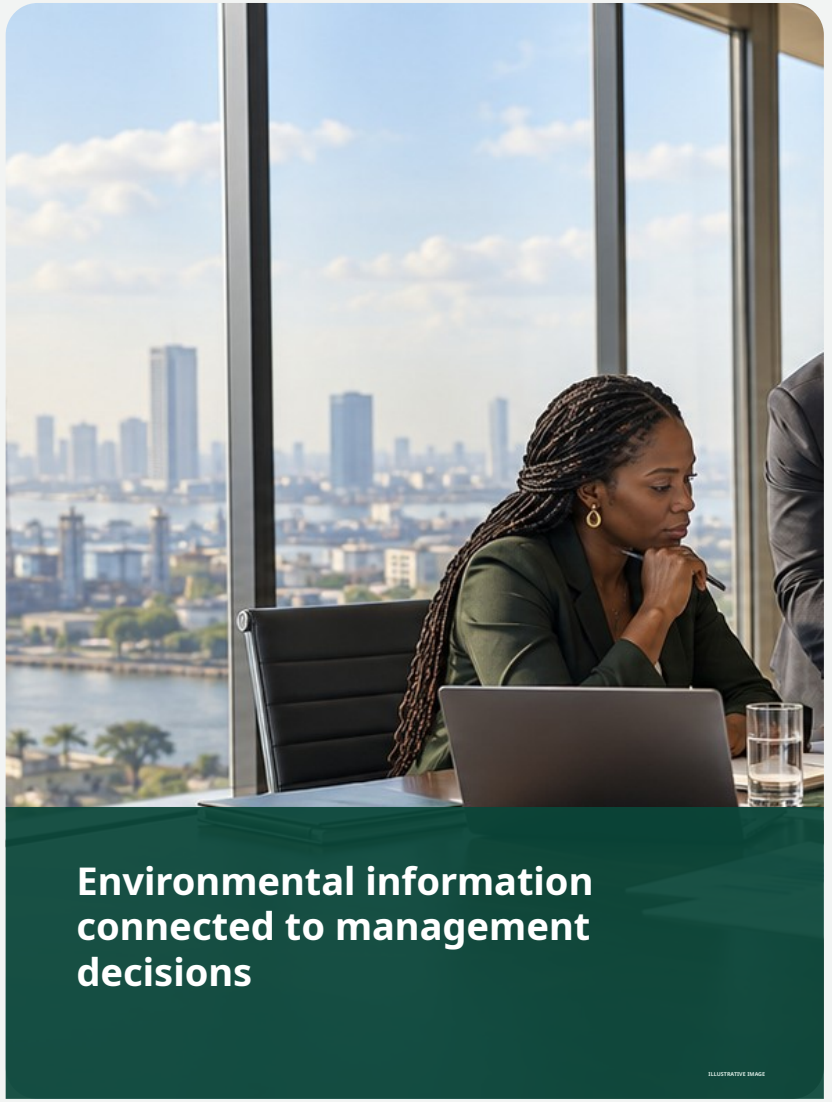

# 07 Sustainability and ESG advisory

## Sustainability priorities connected to governance and management decisions.

Our support can begin with a focused diagnostic and extend to systems, performance indicators, reporting and implementation.

**SCOPE OF SUPPORT**

- Sustainability and ESG diagnostics
- ESG strategy and implementation support
- Performance indicators and reporting
- Environmental and social due diligence
- Sustainability benchmarking
- Improvement planning and advisory

**Environmental information connected to management decisions**

ILLUSTRATIVE IMAGE

# Environmental and HSE management systems

## Clear responsibilities, documented controls and evidence of implementation

We support organisations to establish or strengthen systems that integrate environmental and HSE requirements into routine management. The objective is a practical system that people understand and management can verify.

**ISO-aligned support**
**ISO 14001**
**ISO 45001**
**ISO 9001 interfaces**

01

### Diagnostic review

Assess existing systems, obligations and operating gaps

02

### System design

Develop policies, responsibilities, procedures and tools

03

### Implementation

Support communication, training and operational use

04

### Assurance

Audit evidence, corrective actions and management review

# 09 HSE, risk and capacity development

## Competence and practical controls that make safer performance repeatable.

Effective systems depend on people understanding risks and applying controls consistently. We combine risk review, practical procedures and tailored learning.

**SCOPE OF SUPPORT**

- HSE audits and risk assessments
- Hazard identification and control planning
- Emergency preparedness and response
- Procedures and compliance guidance
- Environmental and HSE awareness training
- Management and workforce development

**Learning connected to the work environment and real responsibilities**

ILLUSTRATIVE IMAGE

# Continuous environmental support

## Ongoing guidance for organisations that need more than a periodic compliance exercise

Environmental obligations evolve as facilities change, permits approach renewal and monitoring reveals new risks. Our continuing support gives management access to practical advice, structured follow-through and a dependable performance record.

### Single assignment

Focused technical support

### Facility programme

Coordinated environmental activities

### Multi-site support

Consistent standards across locations

### Retainership

Advice, monitoring and close-out

**The engagement scope follows the client's operating rhythm, risk profile and reporting needs.**

# Industries we support

## Different operating environments require different environmental responses

**The same technical standard, adapted to the client's operation.**

| | |
|---|---|
| 01 | Maritime and port operations |
| 02 | Oil, gas and petroleum retail |
| 03 | Manufacturing and industrial facilities |
| 04 | Construction and infrastructure |
| 05 | Retail, commercial and hospitality |
| 06 | Recycling and waste management |
| 07 | Food and consumer products |
| 08 | Conservation and community developments |

# How we work

## Context first, evidence throughout and improvement that can be sustained

We begin by understanding the facility, activities, obligations and management priorities. Field evidence and regulatory knowledge then shape a response that the organisation can implement and verify.

**01**
### Understand
Context and obligations

**02**
### Assess
Evidence and gaps

**03**
### Design
Controls and documentation

**04**
### Implement
Coordination and training

**05**
### Verify
Monitoring and close-out

**A consistent technical standard applied to solutions designed around each client's reality.**

EnviroSafe TECH LLP.

# EXPERIENCE ACROSS OPERATING CONTEXTS

**Our assignments span project approvals, environmental audits, field monitoring, compliance support, waste management and sustainability advisory.**

We adapt the technical scope to each site, sector and regulatory pathway. This allows the same professional standard to support short studies, recurring compliance needs and longer-term environmental management engagements.

**A consolidated list of major engagements follows.**

# Major engagements

## Representative assignments across regulated sectors

| | | | | | |
|---|---|---|---|---|---|
| **APM Terminals Apapa** | Environmental management services | **SKY MALL** | Environmental assessment and audit | **Lufasi Park** | Environmental assessment |
| **Chef Eros and Company Limited** | Environmental assessment | **Jaiyes Place Luxury Hotel and Resort** | Environmental assessment | **BLENCO Supermarket** | Environmental assessment |
| **Easysauces Nigeria Limited** | Environmental audit | **EPCM Engineers Limited** | Environmental audit | **Romco Recycling Company** | Environmental audit |
| **Vava Furniture** | Environmental audit | **Danco Petroleum** | Environmental station audit | **Unioncrest Capital Limited** | Collaborative sustainability and ESG advisory |

MAJOR CLIENT LOGOS

# Multidisciplinary technical capacity

## The right expertise assembled around each assignment

Environmental challenges often cross professional boundaries. Envirosafe coordinates relevant specialists and service providers so fieldwork, analysis, reporting and implementation remain connected to one clear assignment objective.

**Capability scaled to assignment need and coordinated through one accountable project lead.**

- COREN-registered engineers
- Environmental and social specialists
- HSE and emergency-response professionals
- Field monitoring and sampling personnel
- Spill-response and remediation specialists
- Approved laboratories and analytical support
- ESG and sustainability professionals
- Waste-management service providers
- GIS, data and mapping capability

# Leadership and key personnel

## Dare Ayodele Joshua

**Managing Partner and Lead Consultant**

Provides strategic and technical leadership across environmental assessment, compliance, management systems and sustainability. He brings more than 13 years of professional experience.

## Atoyebi Yetunde Modupeoluwa

**Managing Partner and Regulatory Compliance Lead**

Leads regulatory and compliance coordination, supporting delivery quality, documentation strength and client readiness across assignments.

## Engr. Omoni Keji

**Operations Manager**

Supports operations planning and delivery coordination across client engagements. She holds a BSc in Chemical Engineering and an MSc in Sustainable Energy and Environment.

**Associate consultants**

**Grace Balogun-Ifesanmi, Operations and Sustainability**

**Azeez Akintayo Ogundiran, EIA, ESIA and ESG**

**Esther Mewayone, Compliance and Audit**

# Quality, HSE and professional commitment

## Disciplined delivery from fieldwork to final documentation

### Safe field practice

We plan activities around the people, site and task risks involved.

### Defensible methods

We use competent resources and appropriate evidence for the assignment.

### Document control

We maintain clear records that support review and regulatory engagement.

### Professional conduct

We communicate honestly and protect the independence of our advice.

### Continuous improvement

We track corrective action and support measurable progress.

**Our commitment applies to every assignment, regardless of size or duration.**

EnviroSafe
